

## June 26, 2008 - Murtha Comments on Proposed Army FCS Changes

WASHINGTON, D.C. -- Congressman John P. Murtha, Chairman of the House Appropriations Subcommittee on Defense, released the following statement today in reference to the Defense Department's proposed changes to the Army's Future Combat Systems (FCS):

"I met with General Casey this morning to discuss the proposed changes to the FCS program.

"I'm convinced that the Army is making changes that will ultimately make the FCS program more viable.

"The committee will evaluate the details of these proposed changes to ensure that these technologies are both mature and integrated with the Army's reset and rehabilitation plans."
