Murtha Statement on Clymer Boro

Clymer, PA - Congressman John Murtha today issued the following statement regarding the Clymer Boro Army Corp of Engineers project:

"It gives me great pleasure to see this project taking this significant step," said Murtha. "With this agreement, the Army Corps of Engineers can now move forward in developing a solution for the flooding problems Clymer Boro has experienced over the years."

"We have been working on this over the past several years and I'm very happy that I am able to help. With the most recent appropriation to the Army Corps, there is enough money now to move forward and define a feasible project."
